PROFESSIONAL SUMMARY

Results-driven Flutter Developer with 5 years of experience building cross-platform mobile applications, specializing in real-time data processing and high-performance app architecture. Skilled in Dart programming, efficient state management (Provider, Getx, Mobx Provider), and API integration (REST API). Proven track record delivering scalable digital solutions in Data Collection [Carbon project].

TECHNICAL PROFICIENCY

- **Languages:** Dart, Kotlin, Swift
- **Framework:** Flutter
- **Real-Time Data Processing:** WebSockets, Socket.IO
- **Databases:** Firebase, Shared preferences, Hive
- **CI/CD & DevOps:** Git, GitHub, Jira, Clickup
- **API & Integration:** REST APIs, Push Notifications, Payment Gateways, Analytics

SOFT SKILLS

- **Problem-Solving & Critical Thinking:** Analyze and resolve technical challenges for seamless application performance.
- **Collaboration & Communication:** Effective engagement with product owners, UX/UI designers, and developers
- **UX & Design Sensibility:** Translate complex designs into intuitive, polished apps.
- **Strong Communication:** Clearly articulate technical concepts across the team.
- **Proactive Troubleshooting:** Quickly diagnose and resolve technical issues; thrive in startup environments.

EXPERIENCE

Mobile App Developer | Offsetfarm - Noida, India (Remote)

Dec 2022 – Present

Current Roles & Responsibilities:

- Leading end-to-end development of Trace Plus / Connect, a large-scale Flutter mobile application used for carbon project data collection and distribution.
- Designing and implementing scalable, maintainable Flutter architecture, ensuring high performance and long-term code ownership.
- Developing complex features including barcode scanning, digital signature capture, KML file generation for Google Earth, and advanced form-based survey workflows.
- Integrating Google Maps API for live GPS tracking, polygon/area calculation, and forestry project boundary mapping in low-connectivity rural environments.
- Implementing offline-first architecture, enabling the app to function fully without internet by storing and syncing data using Hive local database.
- Handling background location tracking and optimizing GPS accuracy across low-end devices.
- Actively involved in app release management, production bug fixing, and continuous feature enhancements based on field feedback.

Mobile App Developer | AlignApps Technology - Surat, India

Jan 2021 – Nov 2022

- Translated basic design plans into full mobile app frameworks, delegating project components to appropriate team members. Diagnosed performance issues, and fix bugs (including crashes and ANRs) to increase the functionality of the application.
- Implemented real-time chatting (Socket.IO), push notifications, payment gateway, deeplink and in-app purchases.
- Right well-structured code and follow MVC, MVVM, based code.

PROJECT WORK

Trace plus - Data collection App

- TRACE PLUS simplifies complex data collection, offering a robust solution for organizations to manage surveys and trace customer engagements with efficiency.
- TRACE PLUS is a powerful offline-first data collection app designed for Infosys and partner organizations to manage surveys and field operations for climate action and sustainability programs. It simplifies complex data capture, ensures accurate on-ground information, and syncs securely once internet is available.
- Built as part of the Enterprise Suite for Climate Action & Sustainability Management, TRACE PLUS enables efficient survey execution, reliable field data, and end-to-end traceability across projects.

Connect - Distribution App

- Connect helps you on-board customers, do baseline assessments and distribute seamlessly.
- Dynamically generates leads and tracks them
- Guides each lead through a product/service distribution journey, and Works offline, syncing later when internet is available

GREBO - The Business App

- Search for black owned businesses with ability to interact with the businesses and patrons of those businesses sharing experiences with the businesses, opinions and reviews of their products and/or services along with photo and video media.

MSPEducare

- MSPEducare is a modern e-platform designed to automate day to day activities of the school by converting it to a Smart Campus ,by reducing paperwork(moving towards nil paperwork),communication gap of parents.

ShiftBOOKD

- ShiftBOOKD is an innovative appointment scheduling platform. We offer innovative tools for beauty and hair care professionals. ShiftBOOKD makes it easy for clients to discover professionals and book with them instantly. Our mission is to help millions of entrepreneurs in the beauty and hair care industry build business through collaborations.

Sklr (Football Coach and Player app - Client Project)

- Real-time chatting capability ensures instant communication for quick updates and coordination.
- Secure payment integration for booking sessions, subscribing to premium content, or accessing exclusive training materials.
- Allows users to jump directly to specific screens or content from external links.

Other Apps, Maintenance & Enhancements

- Worked on Productivity, Entertainment, Education, Business, Health & Fitness, Lifestyle, Food & Drink, News, Photo & Video, Tools, Travel, Shopping, Dating, Music, Utilities, Parenting, Sports, Books, and Medical applications.

EDUCATION

Bachelor of Computer Application – BCA, VNSGU, Surat India

June 2017 – July 2020
